Standard Cross Section E-H-JR Adopted December, 1956 as shown on sheet No. 2 to be used on this project.

Standard Divided Lane Sections Adopted January, 1957 as shown on sheet No. 3 to be used on this project.

Typical Cross Sections as shown on sheets No. 4, 5 & 6 to be used on this project.

State Highway Department of Indiana Standard Specifications dated 1957 to be used with these plans.

Grade line as shown on Profile represents top of finished surface

Standards under Dates as listed in Index on title sheet to be used on this project

Ditches of 1% and over shall be sodded except where Frontage Road fill slope falls on Main Line fill slope. These ditches of ½% and over shall be sodded.

All shoulders, cut and fill slopes shall be plain or mulch seeded except where sodding is specified.

Shoulders are to be sodded as shown on Miscellaneous Standard Sheet "B".

Sodding shall be placed along Paved Side Ditch as shown on Miscellaneous Standard Sheet "E".

Quantities for Pipe Culvert Headwalls are based on using Standard Headwalls for retaining 2:1 slopes and Private Drive Headwalls for retaining 4:1 slopes.

For kinds of pipe permitted for each size and classification as shown in structure, see Miscellaneous Standard Sheet "F".

Right-of-Way Fence, Chain Link Type, shall be constructed on all Limited Access Right-of-Way

——o——o—— Indicates R/W Fence at locations other than R/W Lines

Excavation Quantities as shown on Plan & Profile sheets include estimated excavation for Private & Public Approaches (See table on sheet No. 64)
